PROJECTS

Project Name: Quiccle

Role: Developer   **Project Duration:** 5 Month

Project Detail   Quiccle is a revolutionized chrome extensions aimed at improvising the user's browsing experience by giving them convenient access to Google search. With Quiccle, the user can search any text present on a web page, simply by selecting it, and pressing "CTRL + Space". The search result is also presented in the top right corner of the window, in a popup. Thus, the user does not have to change tabs for searching anything, keeping them focused on their main work.

Project Name: My Travel Diaries

Role: Full Stack Developer   **Project Duration:** 2 Month

Project Detail   This is a Full Stack MERN Application. It is a travel diary, where users can record their memorable visits and trips to amazing locations. It features authentication with account registration and login. Link to deployed application: sleepy-eyrie-19938.herokuapp.com

Project Name: Smug-Hub

Role: Full Stack Developer   **Team Size:** 4   **Project Duration:** 2 Month

Project Detail   Smug-Hub: I along with my senior run a initial stage startup and wanted a platform where we can assign work to out interns and have them submit back their work. I took an initiative to develop a platform for this and Smug-Hub is the result of that. It also allows us to check the work submitted by the intern and take action on it.

Project Name: Data Scraping Chrome Extension

Role: Developer   **Project Duration:** 3 Month

Project Detail   Under this project, I developed a Chrome Extension that scrapes text and media from a webpage that activates the extension Link to the code: https://github.com/GauravKr0715/CE-Data-Scraping-Ext.

Project Name: Random Password Generator
